

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of the claims in the application:

Listing of Claims:

1. (Currently amended) Health shoes comprising cumulate layers including a layer of cup in sole layer (36), middle sole layer (34), high elasticity sponge layer (32), and cushion layer (30); a plurality of round-shaped seat holes (22) formed in a thickness direction of a bottom rubber sole (20)-formed at a lower part of said cushion layer (30); and metal balls (26) to be fixed in the plurality of round-shaped seat holes (22), wherein diameters of the plurality of round-shaped seat holes (22) are gradually reduced from heel part to front part of the bottom rubber sole (20), and the metal balls (26) fixed in the plurality of round-shaped seat holes (22) are formed to be same sizes as the diameters of the plurality of round-shaped seat holes (22), wherein more than two refraction line holes are formed in a width direction at the front of the bottom rubber sole.
2. (Canceled)
3. (Canceled)
4. (Canceled)

5. (Currently amended) A health shoe comprising:

cumulate layers including a layer of cup in sole layer ~~(36)~~, middle sole layer ~~(34)~~, high elasticity sponge layer ~~(32)~~, and cushion layer ~~(30)~~;

a plurality of rows of round-shaped seat holes ~~(22)~~, the round shaped seat holes ~~(22)~~ formed in a thickness direction of a bottom rubber sole ~~(20)~~, the rows formed in a width direction of the bottom rubber sole ~~(20)~~, and the bottom rubber sole ~~(20)~~ formed at a lower part of said cushion layer ~~(30)~~;

metal balls ~~(26)~~ to be fixed in the plurality of round-shaped seat holes ~~(22)~~; and

a plurality of refraction line holes ~~(40)~~ formed in the width direction at a front of the bottom rubber sole ~~(20)~~, wherein each of the plurality of refraction line holes ~~(40)~~ is formed in between rows of round-shaped seat holes ~~(22)~~.
